Appendix 2: Concordance: Wall numbers and B&B numeration

For clarity, each wall has been awarded a number, which applies between junctions (or corners) on that wall. Use is *a* for 'exterior' of wall (based on B&B 'areas'), and *b* for interior. In practice, textual use is to use simpler 'exterior' for *a*, and 'interior' for *b*.

Each individual work unit has been given a sequential number (see PART 1).

Wall number	b&b equivalent	Comments
